

Steel Dock Canopies

Steel Truck Dock Canopy

Steel loading dock canopies, or hoods, are designed to be installed over an existing dock seal or shelter to assist in preventing rain water or snow build-up on your dock enclosure. While dock seals and shelters are excellent stand-alone solutions for sealing your dock opening, dock canopies provide an added layer of protection. Our steel hoods include a 2" x 2" gutter and self-sealing fasteners to prevent water penetration. Engineered from strong, heavy gauge steel, dock canopies are designed to last years at your truck dock.

- ◆ Constructed with 14, 16 or 18 Gauge steel for long-lasting use.
- ◆ 2" x 2" gutter system pushes water off to the sides of the dock opening.
- ◆ Minimum of (5) structural supports per hood for rigidity.
- ◆ Self-sealing fasteners to prevent water penetration on top of the hood.
- ◆ Pre-assembled at factory for easy installation and cost savings.

Product Details

Steel Gauge	14, 16, or 18
Color	Steel (Not Painted)
Projection	18", 24", or 36"
Weight	52# to 185#
Width	10', 11', or 12'
Height	7", 9", or 11"
Assembly	Not Required
Hardware	Not Included
Mounting Holes	1/2" dia.
Warranty	1 year limited
Lead Time	2-3 Weeks
Country Origin	Made in USA
