

Track Guard

Track Guard Benefits

- Designed to withstand light fork truck and pallet impact while protecting the overhead door track from damage
- Powder coated safety-yellow makes it easy for the fork truck operator to identify the edge of the door opening
- Available in three convenient sizes based on the amount of protection required; 24", 36" and 48" models available
- Heavy duty 3/16" track plate with 1/2" base plate
- Unit mounts to both the floor and to the wall providing extra strength and durability
- Top taper helps prevent finger pinching by pushing the hand away from the unit while the door is closing
- Unit is pre-drilled. Simply set the unit around the door track, snug it up to the wall and anchor in place
- Works on both mechanical and automatic doors

Overhead Door Track Protection

The top of the unit is tapered as a safety precaution. The taper helps drive the hand out of the way while the door is closing helping to prevent hand and finger accidents. The unit comes pre-drilled for easy install.

Track Guard was designed with the protection of the door track in mind. The heavy gauge steel construction wraps around the bottom of the door track protecting it from the bumps and bangs which occur while loading or unloading a truck.

The Track Guard acts as a barrier from impacts by using both the wall and the floor for support. The Protecto Track deflects impacts away from the door track protecting it from expensive damages and costly repair time.

The Track Guard is powder coated safety yellow making it easier for the fork truck operator to see. Whether you use pallet jacks or fork trucks, the Track Guard keeps you protected. The unit is available in three heights depending on your needs; 24", 36", or 48". Each Track Guard comes with a one year warranty on construction.

Distributed By: _____
