- Oversized 5.5" x 3.5" angle 1/2" thick top plate
- Oversized 16" x 19.5" base for maximum stability
- Ergonomically designed bicycle style handle with vinyl grips
- 16" semi-pneumatic tires for easy mobility on all surfaces

# Trailer Stabilizer

*Stabilizer Stand shown holding up trailer*

The Allied Solutions heavy duty trailer stabilizer is used to support and level the trailer while it is sitting or being loaded and unloaded at the loading dock. It uses a 2 speed gearbox making for fast contact with the trailer. With both an oversized top plate and base plate, the design allows it to securely hold the trailer in place.

The Allied Solutions stabilizer stand has an integrated carrying handle, and the adjuster pulls have vinyl grips, making transporting and adjusting to the trailer fast and easy.

Both trailer stabilizers are finished in bright yellow for quick identification by drivers and dock workers.
