

TOUGH APPLICATIONS, TOUGHER SOLUTIONS

A complete line of powerfully safe equipment, engineered for **YOUR** facility.

Dock Levelers & Restraints

Poweramp® offers a wide range of hydraulic, air powered, mechanical, vertical storing, edge-of-dock, specialty dock levelers and yard ramps. All Poweramp levelers are designed with a focus on structural integrity, reliability and safety. Through our partnership with Poweramp®, we can customize your loading dock to meet your specific requirements.

For more than 50 years, customers have relied on Poweramp® to deliver safe and efficient loading dock equipment. They continue to develop new products and designs to address an ever changing landscape in building design, end-user requirements and dock safety regulations.

Dock Seals & Shelters

Fairborn created the first certified, superior performance fabric designed solely for the construction of dock seals and shelters. Fairborn's field proven Dynalon has been widely accepted by industry, and continues to lead with many specifying agencies and quality minded customers throughout the world.

Fairborn is dedicated to the production of the highest caliber products. This commitment results in life expectancy far beyond any competitive model and ensures our customers maximum value. Years of design, research and development have made for the most complete and reliable line of Fairborn products.

Speed Performance Doors

For over 25 years, DYNACO innovation has consistently lead the way in real door safety, environmental control, feature-rich high speed doors, world-wide. And, has been able to deliver all this with cost savings, and extremely low maintenance, thus increasing your productivity, all while contributing to your bottom line.

Without any rigid bottom bars or stiffeners, DYNACO soft bottom edge and flexible curtain are totally forgiving, posing ZERO hazards to people and product. For doors that are virtually incapable of injuring people or equipment without exception, DYNACO's fabric doors are your safest choice!

- Safety Enclosures
- Bug Screen Doors

- Dock Communication
- Loading Dock Lights
- Dock Safety Products
- Guardrail Systems
- Bascule Bridges
- Truck Leveling Systems
- And many more!

NEW INSTALLATIONS

Although this service is commonly offered by industrial equipment suppliers, the quality of work our team puts out is not. Our crew consists of perfectionists, people who don't stop until the job is complete - a seamless install complete to the highest level. If you're looking for satisfactory, we will not be able to fulfill your request. If you're looking for a team ready to exceed your expectations, your search ends now.

PLANNED MAINTENANCE

Any business, small or large, knows that down equipment is cause for headache and dead-weight loss for your organization. We know it too. It's our goal to avoid this loss with our Planned Preventative Maintenance (PPM) programs. PPM programs allow your organization the predictability of costs and confidence in your equipment that results in more working and less loss to your business.

PARTS & SERVICE

Finding the right service team responsible for keeping your equipment running isn't always the easiest task. Whether they're weeks late or lack the knowledge to fix your equipment properly, you won't find that to be the case with Excel. With factory trained technicians comprised of union and non-union workers, you can be confident that we will keep your equipment in proper operation.

CONCRETE REPAIR

Loading docks that are in poor condition can be just as unsafe (let alone inefficient) as loading docks without trailer restraints or proper seals. Getting your loading docks in proper condition for safety and efficiency should be priority 1, 2 and 3. Needless to say, we have you covered. Our professional service team is prepared to tackle the concrete work required to get your loading docks back in safe operation.

**WHEN YOU'RE READY TO DISCUSS THE DETAILS OF YOUR SERVICE NEEDS, FEEL FREE TO DROP US A LINE
WE'RE ALWAYS AVAILABLE**

- ✓ Always on time and available
- ✓ Professional repair and service execution
- ✓ Transparent and proficient communication
- ✓ Knowledgeable team you can rely on
- ✓ Quality comes standard on every project

DOCK LEVELER COMPARISON

MECHANICAL

Advantages

- E> Low upfront cost
- E> No electrical requirements
- E> 12" above and below dock range

Disadvantages

- E> Manual "walk down" operation
- E> High maintenance costs (regardless of manufacture)
- E> Expensive ware items

AIR POWERED

Advantages

- E> Easy activation - removing "walk down" operation
- E> No hydraulic fluid required
- E> Interlock capability and safety features

Disadvantages

- E> Mechanical lip and safety legs
- E> Some capacity limitation
- E> Requires 110V electrical hookup (some models)

HYDRAULIC

Advantages

- E> Safest style of dock leveler
- E> Less maintenance required
- E> Easy, push-button operation
- E> Free float, entire service range
- E> Fully hydraulic lip and deck

Disadvantages

- E> Higher upfront cost
- E> Requires electrical hookup

WE ARE YOUR SOLUTION™
